Fabric backed SHEET

Good Weldability

NovaFab Polypropylene glass lined (PPGL) Sheets are Engineering Plastics sheets that are laminated with a polyester or glass fabric layer on one side. As the fabric are laminated during the production process itself, the bonding of the fabric to the sheet is of excellent quality. The peel strength thus provided is very strong. The dual-layer construction of sheets are used in a variety of applications primarily where Fibre Reinforcement is required. the sheet acts as a liner in these applications.
